PROFILE

Final-year Software Engineering undergraduate at the University of Sri Jayewardenepura with hands-on experience in artificial intelligence, machine learning, full-stack development, and cloud computing. Experienced in building web applications, AI-powered systems, machine learning services, and event-driven platforms. Seeking a Software Engineering, AI/ML, Full-Stack, or Cloud internship to apply technical knowledge to real-world projects

EDUCATION

University of Sri Jayewardenepura <i>Bachelor of Computing Honours in Software Engineering (B.Comp. Hons. in Software Engineering)</i>	Nugegoda, Sri Lanka 2023 – Present
Holy Family Convent <i>G.C.E. Advanced Level Examination (2021) & G.C.E. Ordinary Level Examination (2017)</i>	Kalutara, Sri Lanka 2007 – 2021

TECHNICAL PROJECTS

CloudPilot-MLOps 🔄	2026
- Built an end-to-end MLOps pipeline for model training, experiment tracking, and containerized deployment. - Developed a FastAPI prediction service with MLflow and Docker integration. Tech Stack: Python, FastAPI, MLflow, Docker, XGBoost, Scikit-learn	
FlowForge – Event-Driven Order Processing Platform 🔄	2026
- Developed an event-driven microservices platform with asynchronous service communication. - Containerized services for scalable development and deployment. Tech Stack: Microservices, Event-Driven Architecture, REST APIs, Docker	
AURA AI – Personal AI Companion 🔄	2026
- Built an AI-powered assistant with personalized conversations using OpenRouter API. - Implemented Google Authentication and persistent chat history with Firebase. Tech Stack: React.js, Firebase, OpenRouter API, JavaScript	
SimTraffic-AI 🔄	2026
- Developed an AI-based traffic simulation system for traffic analysis and decision support. - Designed simulation scenarios for evaluating intelligent traffic control strategies. Tech Stack: Python, AI, Traffic Simulation	

TECHNICAL SKILLS

- Programming Languages:** Python, Java, JavaScript, TypeScript, SQL, C
- Frameworks and Technologies:** React.js, Next.js, Node.js, Express.js, FastAPI, Firebase
- AI and Machine Learning:** TScikit-learn, XGBoost, Natural Language Processing, Computer Vision
- Cloud and DevOps:** Microsoft Azure, Docker, GitHub Actions, MLflow
- Databases:** MySQL, MongoDB, PostgreSQL, Firebase
- Tools:** Git, GitHub, Postman, VS Code, Figma, Netlify

RESEARCH

Final Year Undergraduate Research

2026 – Present

Multi-Modal Fake Profile Detection Using Conversational Behavior and Profile Image Analysis in Online Dating Platforms

- Investigating Natural Language Processing, Computer Vision, and multimodal fusion techniques for explainable detection.

SELECTED PUBLICATIONS

AI-Based Detection of Fake Users in Online Dating Platforms: A Review of Chat and Profile Image Analysis Techniques

2026

JCoS University Library Repository

Published

EXPERIENCE

People's Bank

Student Trainee

Kalutara, Sri Lanka

Apr 2022 – Jan 2023

LEADERSHIP AND ACTIVITIES

EduACS, University of Sri Jayewardenepura

Secretary

Sri Lanka

2024 – 2025

Beauty of Cloud - IEEE Computer Society Student Branch Chapter, University of Sri Jayewardenepura

Design and Marketing Committee Member

Sri Lanka

2025

Holy Family Convent

Deputy Head Prefect

Kalutara, Sri Lanka

2019

ACHIEVEMENTS AND CERTIFICATIONS

- **Finalist - Artemia 1.0 Ideathon, IEEE WIE, 2025:** Contributed to SafeHer Empower, a women-focused safety and community support platform.
- **Research Presenter - JCoS 2026:** Presented research on AI-based fake-user detection in online dating platforms.
- **Inter-University Startup Challenge, 2024:** Collaborated with Team SECRETX to develop ShareCom, an educational social platform concept.
- **Java Programming Master - Evotech Education, 2024.**
- **Full Git Course - DataCamp.**
- **Build Your Own Live IPL Score App using React.js and JavaScript - DevTown and Microsoft Student Chapter.**
